PROFILE

Full Professor of Artificial Intelligence at Sapienza University of Rome, where I lead the RSTLess group (Robust, Safe, and Transparent Machine Learning) and coordinate the Ph.D. Programme in Data Science. Before Sapienza I spent eight years in industry, at Yahoo Labs, Facebook Search and Facebook (now Meta) AI, shipping production systems for sponsored search, query understanding and platform integrity. My research covers retrieval and retrieval-augmented generation, geometric and graph machine learning, and safety and content integrity.

Nearly 200 peer-reviewed publications, more than 60 at CORE A/A* conferences. h-index 52, over 10,700 citations (Google Scholar, October 2026). Eight granted US patents. Full list: https://fabsilvestri.github.io/#publications
